Station information:

For 2021, we want to really highlight portable operations and we are encouraging you to bring your portable set up. We will have the AARA Antenna trailer set up with the tri-band beam antenna that will be driven by a Yeasu 450D for use. If you bring your own personal set up, please remember to bring all of your necessary gear (portable table, battery power, radio, mic, coax, antenna, headset etc.)

To avoid any transmission interference, we will have band assignments for the different bands recognized by ARRL Field Day. Please help by adhering to band allocations that will be posted. If you want to operate on a “band in use” accommodations can be made to get you in an area that avoids interference. ** Please see Tom or Chris for assistance**

Menu:

The AARA will be providing food and drinks, however, if you have any special dietary requirements or personal preferences, please bring those items with you, as it is impossible to accommodate everyone’s requests.
